**Tushar Singh (Roll No. 1942007)**

**Submitted To:**  
**Ms. Kawalpreet Kaur**  
Assistant Professor  
Department IT

## **ACKNOWLEDGEMENT**

It gives me a great pleasure to take this opportunity to thank **GGDSD COLLEGE** for giving me an excellent opportunity to work in their esteemed organization. I would like to express my sincere token of gratitude to my Mentor and Project Coordinator **Ms. Kawalpreet Kaur** for her invaluable guidance, expert direction and consistent encouragement, which helped me to complete my project successfully.

I would also like to take this opportunity to express my thanks to my friends for their constant guidance, valuable suggestions and moral support. They have always been ready with different ideas to improve the proceedings and quality of output.

# CHAPTER 1

## ***ABSTRACT***

---

**‘Online Library Management System’** is a system which maintains the information about the books present in the library, their authors, the members of library to whom books are issued, library staff and all. This is very difficult to organize manually. Maintenance of all this information manually is a very complex task. Owing to the advancement of technology, organization of an Online Library becomes much simple. The Online Library Management has been designed to computerize and automate the operations performed over the information about the members, book issues and returns and all other operations. This computerization of library helps in many instances of its maintenances. It reduces the workload of management as most of the manual work done is reduced .

The proposed system has records of books. The project has been developed in back-end: PHP, MySQL and front-end: HTML, CSS and JavaScript.

# CHAPTER-2

## ***INTRODUCTION***

---

This chapter gives an overview about the aim, objectives, background and operation of online library management system.

### **1.1 Objective of the project**

Our modern age of technology is great depends on internet. Everything is converted to computer based for easier and faster communication. Here I tried to develop such systems, which will ensure some aspects.

- Reliability, maintainability, cost-effectiveness and a nicer user-friendly environment.
- The objective of the project is to provide an opportunity of getting and issuing books easily.
- Proper management of books, securely stores all records.
- Time Efficient.

### **1.2 Requirement Specification**

#### ***Scope:-***

The scope of the project is updating the manual library system in the software based application so that the user can see details of their account availability of books etc.

- Facility to reserve books that are available.
- Authenticate users at their login.
- To increase the accuracy and efficiency of the procedure.
- Mechanism to create an user id and reset the passwords in case user forget it.

The implementation of the application also gives a hands-on experience in PHP, MySQL.

### **1.3 Problems of the Existing System**

- **Hard to maintain backup because of large and duplication of data**
- **Difficult to obtain book status rapidly.**
- **Students have to visit the college with an appointment to initialize the process of reservation of books.**
- **It is very difficult work to sort the book manually. Data inconsistency may arise in the case several entries of the same book.**
- **Due to tear and loss of issue cards, it is required to make a new library card as soon as possible.**

# CHAPTER 3

## ***PROJECT DESCRIPTION***

---

The “**ONLINE LIBRARY MANAGEMENT SYSTEM**” is a web-based application structured on PHP, MySQL for handling the various functions of the library. It provides a complete solution to the library management which helps librarian.

### **3.1 Proposed System**

This projects used by two types of user

- i. Administrator(librarian)
- ii. User (students)

The system includes the entities as admin. Only few members who called admin (librarian) are able to control that system and able to edit or change it. The admin (librarian) check the books issued and returned by the user (students) in concern with the specified time given. Admin has to login first by his registered username and password.

The second type of user, students has limited data access. User has to first register on website by providing his details required. After that he can login to the website. User will be able to see books he issued and his fine/due which he don't return in specific time period .

Main points are:-

- ❖ For User
  - Add information in system.

- Reserving/issuing books.

❖ For Librarian

- Managing books present and issued.
- Managing user data.
- Regular system updating.

### 3.1 Features of Proposed System

Features of Proposed System as follows:

#### User panel:

- **Add Information:** In this module user can add information about him .
- **Issuing Books :** It is the most important module from where a user can issue books from library by online method. One adds information about him in this. After adding information he is directed to user panel where he can see and issue books concerning the specified time and his dues if any
- **Admin dashboard :**
  - a) Books categories:** Librarian can check and manage the categories of books.
  - b) Update Books :** He can add books by new authors and update the existing one.
  - c) Approval/Managing :** He approves the books as required by the user and manage the registered users. He also looks after the books issued to the registered users.

# CHAPTER 4

## ***SYSTEM REQUIREMENTS***

---

### **1. SOFTWARE REQUIREMENTS:**

- **WAMP:** Microsoft Window OS, Apache MySQL PHP
- **LAMP:** Linux Operating System Apache MySQL PHP
- **MAMP:** Mac OS Apache MySQL PHP
- **XAMPP:** X-OS (Cross Operating System) Apache MySQL PHP
- **VISUAL STUDIO CODE:** Visual Studio Code is a Source-Code Editor developed by Microsoft for Windows, Linux.

### **2. HARDWARE REQUIREMENTS:**

- **PROCESSOR :** Intel(R) Core(TM) i3-4005U CPU @ 1.70GHz  
1.70 GHz
- **RAM :** 4.00 GB
- **SYSTEM TYPE :** 64-bit Operating System, x64-based processor

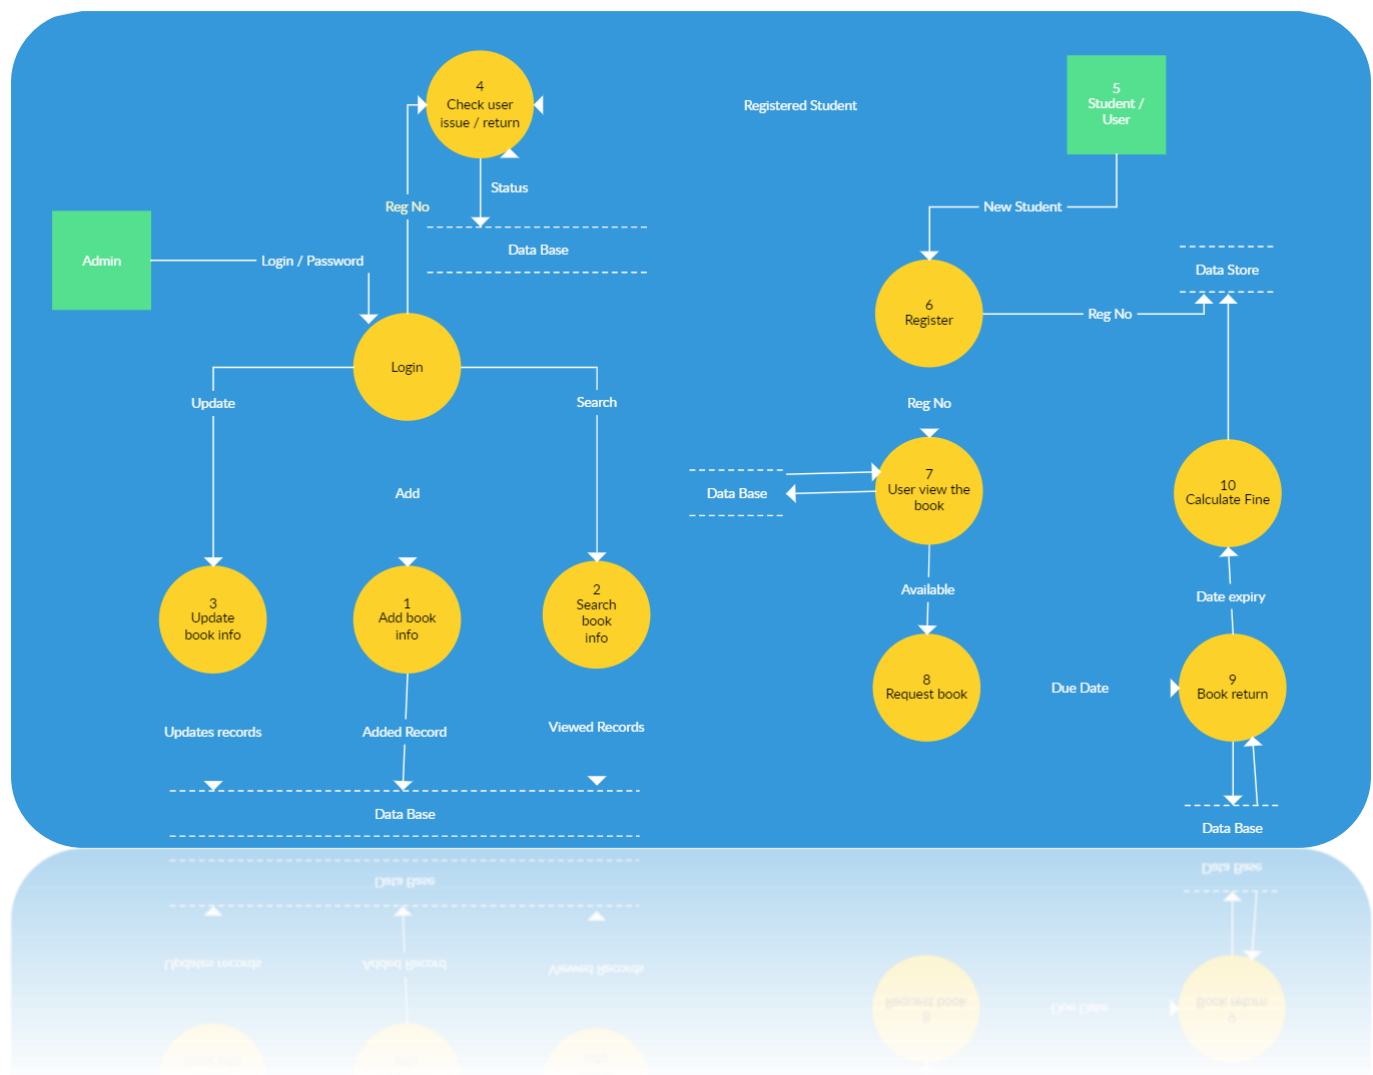

**3. DATABASE REQUIREMENTS:** MySQL Server 5.0 is recommended Included in XAMPP Windows.

**4. WEB SERVER:** apache HTTP Server2.2 is recommended Included in XAMPP Windows.

# CHAPTER 6

## ***PROJECT WORKING***

---

### **1. HOME PAGE:**

This is the front page of the website. In this page we have many things like ADMIN LOGIN, USER SIGNUP and USER LOGIN.

The screenshot displays the 'Online Library Management System' interface. At the top, there is a header with the system name and a navigation bar containing links for 'ADMIN LOGIN', 'USER SIGNUP', and 'USER LOGIN'. Below the navigation bar, the 'USER LOGIN FORM' is prominently displayed. The form includes fields for 'Enter Email id', 'Password', and 'Verification code'. A 'Forgot Password' link is also present. At the bottom of the form, there is a 'LOGIN' button and a link for 'Not Register Yet'. The footer of the page contains the copyright information: '©Online Library Management System | Designed by : Sughuman Mahajan & Tushar'.

### **2. USER SIGNUP:**

In this user add information and make an account. In this user add FULLNAME, MOBILE NO., EMAIL, PASSWORD and VERIFICATION CODE.

The screenshot shows the 'USER SIGNUP' page of the 'Online Library Management System'. The page has a header with the system name and navigation links for 'ADMIN LOGIN', 'USER SIGNUP', and 'USER LOGIN'. The main content area is titled 'USER SIGNUP' and contains a 'SIGNUP FORM'. The form includes input fields for 'Enter Full Name', 'Mobile Number', 'Enter Email', 'Enter Password', 'Confirm Password', and a 'Verification code' field with a refresh button. A 'Register Now' button is at the bottom of the form. The footer contains the copyright notice: '©Online Library Management System | Designed by : Suguman Mahajan & Tushar'.

### 3. USER LOGIN:

It is a screenshot of the books issued by user with all the data of user , when book was issued and which book was issued . User can also update the profile and even can change password.

The screenshot shows the user dashboard of the 'Online Library Management System'. The header includes the system name, a 'LOG ME OUT' button, and navigation links for 'DASHBOARD', 'ACCOUNT', and 'ISSUED BOOKS'. The 'ACCOUNT' link is expanded, showing options for 'MY PROFILE' and 'CHANGE PASSWORD'. The main content area is titled 'MANAGE ISSUED BOOKS' and contains a table of issued books. The table has columns for '#', 'Book Name', 'ISBN', 'Issued Date', 'Return Date', and 'Fine In(USD)'. A search bar and a dropdown for 'records per page' are also present. The footer contains the copyright notice: '©Online Library Management System | Designed by : Suguman Mahajan & Tushar'.

#	Book Name	ISBN	Issued Date	Return Date	Fine In(USD)
1	Physics	1111	2020-09-13 17:36:03	Not Return Yet	

### 4. ADMIN LOGIN PAGE:

This is ADMIN LOGIN PAGE. To login in Admin page the username is **admin** and password is **1234**.

# CHAPTER 7

## ***FUTURE SCOPE***

---

- We can give more advance software for Online Libraray Management including more features like downloading E-Books.
- Managing of Books.
- User Information Management.
- Add more Books, Books Categories and Authors.
- Give confirmation by email and phone to users.

# CHAPTER 8
